Swedish Residence & Work Permit | **Immediate Joiner**

Full Stack Developer / PHP Developer (Laravel)

Backend-focused full-stack engineer with 6+ years developing scalable backend systems and cross-platform applications using **Laravel, PHP, Vue.js, Node, Python, Typescript, JavaScript, React and React Native**. Skilled in API integration, database optimization, Agile/Scrum, and CI/CD pipelines. Strong in frontend/backend development, end-user support. Strong foundation in Object-Oriented Programming, SOLID principles, Domain-Driven Design (DDD), event-driven architecture and managed full sales cycle for a B2B SaaS product.

Specialized in backend architecture, microservices, secure REST APIs, queue workers, performance optimization, and cloud deployments. Experience building enterprise-level platforms including ERP, WMS and inventory systems with **AWS, GCP, Azure Redis, Horizon, SQS, and MySQL, Agile/Scrum**

Core Technical Skills

Backend: PHP 8+ (Laravel, Symfony, CodeIgniter), Node.js, Python, MVC, OOP, SOLID, DDD, Event-Driven Development, REST, OAuth/JWT

Frontend: Vue.js, React, Blade, Tailwind CSS, Livewire, JavaScript, Vite, TypeScript

Mobile: React Native (Android/iOS integration), Uber APIs

Database: MySQL, MariaDB, PostgreSQL, MongoDB, schema design, indexing, query profiling, data modeling, ETL

Infrastructure & DevOps: AWS (EC2, S3, SQS, RDS, Lambda), GCP, Azure, Docker, Kubernetes, Red Hat OpenShift, Redis, Laravel Forge, CI/CD (GitHub Actions), Ubuntu & Debian Linux, Apache, Firebase

Monitoring & Observability: Grafana, Prometheus, Sentry

Testing & Quality: PHPUnit, Pest, Integration Tests, End-to-End Testing, PSRs, Git, Code Reviews, Vitest, Jest, Cypress, CI/CD Pipelines

Support & Operations: L1 & L2 Application Support, ITIL, System Configuration, Troubleshooting, ETL, MS Office

CMS & eCommerce:

- **WordPress:** SEO, Blogs, Plugin Dev, Theme Customization, REST API, GTMetrix/PageSpeed Optimization, Gutenberg, ACF, WooCommerce, Yoast
- **Shopify:** Liquid, Theme Dev, App Dev, API, Webhooks, Headless Shopify

Other / Additional Skills: Secure coding, caching strategies, performance optimization, GDPR-conscious development, JIRA & Confluence, Geocode (Google Maps), SEO, Digital Marketing, Documentation, End-User Training

Professional Experience

Software Engineer (Laravel / Node.js / React / React Native)

Skills Outsource Think Pvt Ltd, Bangalore

Sep 2023 – Aug 2025

- Designed and developed backend services and microservices using Laravel, PHP, TypeScript
- Implemented domain-driven workflows with Events, Listeners, Ques, Jobs & Horizon
- Built secure REST APIs powering web and mobile apps
- Integrated **React Native mobile applications** with backend logic (driver & rider functionality)
- Developed booking flows, ride logic, push notifications, and secure payments
- Implemented automated unit/integration tests with PHPUnit & Pest
- Deployed production systems using AWS (EC2, S3, SQS), Docker, and Laravel Forge
- Ensured performance tuning and scalable architecture with Redis caching and database optimization

Key Project — Eurecab Ride-Hailing Platform

Stack: Laravel, Vue.js, React Native, Node, Adyen, Redis, Horizon, SQS, Sentry, AWS

- Developed backend modules for booking, pricing, ride management & driver/rider workflows
 - Integrated **Eurecab Android/iOS mobile apps** using React Native
 - Implemented secure payment flows (Adyen), subscription logic & data models
 - Built event-driven queue processing and worker services
 - Optimized MySQL queries, indexing, and caching strategies
 - Implemented production observability with Sentry and custom logging
-

Web Developer (Laravel / Vue.js / Symfony / PGSQL)

Allianze Infosoft, Kochi

Mar 2021 – Sep 2023

- Developed CRM, HRMS and warehouse modules using Laravel & Vue.js
 - Implemented ERP/WMS domain workflows and data processes
 - Designed relational database schemas & indexing
 - Built queue-based workflows for notifications, ETL and reporting
 - Participated in Agile development, CI/CD and code reviews
 - WordPress Multilingual Websites – Implemented multisite and Blogs for SEO Optimisation, localization, language routing
-

Application Support Engineer (L1 & L2)

National Informatics Centre (NIC), Kochi

2019 – 2021

- Provided L1 support for large enterprise platforms & ETL and reporting
- Debugged core issues and collaborated with developers & ITIL
- Developed SQL automation scripts and reporting modules and DB backups
- Hands-on exposure to ERP and multi-module enterprise systems

- Provided L2 support for Windows 10/11 desktops, laptops, Mobiles and M365 environments.
 - Supported MAC OS and IOS and Android Device environments and basic printer/network management tasks and Networking Basics (TCP/IP, DNS, VPN)
 - Participated in ITSM-based incident management using ticketing systems.
-

Selected Projects

- **Eurecab – Ride Hailing Platform**
(Laravel, Vue.js, React Native, Redis, Horizon, Adyen, AWS, SQS, Sentry)
Mobile Apps :
<https://play.google.com/store/apps/details?id=com.eurecab&hl=en>
<https://apps.apple.com/us/developer/eurecab/id1295787128>
 - **IT Efficiency – AI-based IT Monitoring Platform**
(NestJS, Node.js, Python, AWS Lambda, Serverless, Microservices, Drizzle ORM, MongoDB)
-

Education

- B.Tech in Computer Science Engineering (2016–2019)
 - Diploma in Computer Science Engineering (2013–2016)
-

Languages

English (Fluent), Swedish, Hindi, Tamil, Kannada, Malayalam
